PROFESSIONAL SUMMARY

Versatile, all-around Full-Stack Developer with a passion for building robust web products from scratch and owning features end to end. Nearly three years of experience shipping dynamic, high-performance web applications built on Next.js, React, and TypeScript. An adaptable problem-solver comfortable jumping into any part of the stack — designing responsive user interfaces, writing clean server-side RPC APIs, integrating complex third-party media and payment APIs, or managing GCP/Vercel cloud deployments. Strongly committed to software reliability, leveraging Vitest and Playwright to ensure seamless production delivery.

SKILLS & TOOLS

Core Stack: Next.js, React, TypeScript, Tailwind CSS, TanStack Query, REST/RPC APIs, GCP, Vercel

Frontend: Next.js, React.js, TypeScript, JavaScript (ES6+), Tailwind CSS, TanStack, HTML5, CSS3, Responsive UI Design, WordPress

Backend & APIs: Next.js Server Components, Next.js API Routes, RPC APIs, RESTful APIs, Python (Flask), Ruby on Rails, Server-Side API Integrations

Integrations: AI Video & Real-Time Media (Akool Face Swap API), Cryptocurrency & Blockchain Payments (BlockBee API)

Cloud & DevOps: Google Cloud Platform (GCP), Vercel, Serverless Architecture, Full-Cycle Web Deployment, Git & Version Control

Testing & AI: Vitest (Unit & Integration), Playwright (E2E Automation), Claude CLI, AI-Assisted Development & Code Optimization

Core Strengths: End-to-End Feature Ownership, All-Round System Architecture, Cross-Functional Outsourced Collaboration, Rapid Prototyping

WORK EXPERIENCE

Junior Full-Stack Developer

September 2023 – Present

MabuhayTech Corporation

- **Full-Stack Next.js Applications:** Delivered multiple production Next.js applications end to end, moving fluidly between rich frontend client experiences and scalable backend services.
- **End-to-End Feature Ownership:** Owned features from architecture through deployment while collaborating cross-functionally within outsourced delivery teams.
- **Advanced Code Optimization:** Reduced page load times by applying advanced Next.js patterns, type-safe RPC APIs, and React Server Components.
- **Cloud Environments & CI/CD:** Sustained reliable production traffic by provisioning and monitoring serverless infrastructure and databases across GCP and Vercel.
- **Rigorous Test Coverage:** Strengthened test coverage and reduced regressions with unit and integration tests in Vitest and end-to-end suites in Playwright, accelerated with Claude CLI.

PROJECTS

Crypto Lending Platform

MabuhayTech Corporation

- Architected a full-stack crypto lending platform featuring tiered accounts, investment-tracking matrices, automated interest logic, and a multi-tier referral system.
- Integrated the BlockBee API to enable secure, real-time cryptocurrency deposits and payouts through the Next.js backend.

Tech: Next.js, TypeScript, Type-Safe RPC APIs, BlockBee API, GCP / Vercel

AI Face-Swap Media Dashboard

MabuhayTech Corporation

- Delivered real-time AI face-swap for live streams by architecting the server-side media infrastructure end to end.
- Integrated the Akool Face Swap API into a custom Next.js dashboard for live monitoring and control.

Tech: Next.js, TypeScript, Akool Face Swap API, Real-Time Media, Server-Side Integrations

Gamified E-Learning Platform

MabuhayTech Corporation

- Built a Udemy-style learning platform with custom gamified interaction loops and intuitive course-management tools.
- Improved user engagement and retention through interactive progression mechanics and a responsive UI.

Tech: Next.js, React, TypeScript, TanStack Query, Tailwind CSS

EDUCATION & CERTIFICATIONS

Full-Stack Web Development Bootcamp

January 2023 – April 2023

Village 88 Inc.

- Back-End Development (Ruby on Rails) — Certified Proficient, April 2023.
- Advanced JavaScript — Certified Proficient, March 2023.
- Web Fundamentals — Certified Proficient, January 2023.

B.S. Computer Science (Undergraduate Coursework)

August 2021 – June 2022

Technological Institute of the Philippines (T.I.P.)

- Completed foundational coursework in engineering principles, programming fundamentals, and technical problem-solving.
